

**Mr. Girish Sethi**  
Senior Director-Energy Program  
TERI

Girish Sethi is Senior Director of the Energy Program at TERI, having more than 37 years of experience in the field of energy, environment and sustainable development. His direct responsibilities at TERI include providing strategic direction and coordinating the activities related to industrial energy efficiency, renewable energy, fuels and electricity including demand side management. He is presently coordinating a new initiative at TERI that looks at options for deep de-carbonization in harder-to-abate industrial sectors like steel and cement in the longer term, including options for use of hydrogen. He has represented TERI in various national and international forums on different aspects related to energy and environment.

He is a Chemical Engineer and holds Master's Degree in Energy Studies from Indian Institute of Technology, New Delhi. He has also completed a multi-disciplinary Masters course on "Technology in the Tropics" from University of Applied Sciences, Cologne, Germany.
